Case study: Web scraping

Mon 11th May - Sun 17th May

Seminar:

This week we will be learning the basics of web scraping. We'll learn how to download and collect own wild data.

Tutorial:

In the tutorial, you'll be exploring examples where large language models are well suited to helping you in your data analytics.

Workshop:

I'll be running an extended consultation for you to ask questions about your assignment. Remember to post questions to the discuss forum ahead of time.

Assessment:

Assignment 3 is out and is due end of the week.

****Help:****

Remember the discussion board is always there should you have questions.
